

# 2025/2026

Predaja samostalne laboratorijske vježbe iz Računalne animacije.

"Potrebno je izraditi git repozitorij u kojem će biti u posebnim direktorijima kodovi za svaku izrađenu vježbu. U glavnom direktoriju treba biti dokumentacija za 3. laboratorijsku vježbu u pdf obliku.

Dokumentacija treba sadržavati kratke upute za pokretanje, te opis što je ostvareno u vježbi uz par slika."

Vizualizacija GPS rute vožnje pomoću Google

(ENG) Naziv rada \*

Visualization of a GPS driving route using Goo

(HRV) Kratki opis do 100 riječi \*

Projekt predstavlja web-aplikaciju za vizualizaciju GPS rute vožnje kandidata autoškole na interaktivnoj karti. Sustav omogućuje prikaz početne i završne točke vožnje, iscrtavanje rute kretanja, označavanje većih i manjih pogrešaka te prikaz smjera kretanja vozila. Razvijen je korištenjem Angular-a za frontend, Firebase-a za bazu podataka i serverless funkcije te Google Maps API-ja za prikaz karata. Cilj projekta je olakšati instruktorima analizu vožnje i kandidatima pružiti bolji uvid u vlastiti napredak.

**(ENG)Kratki opis \***

The project presents a web-application to visualize the GPS driving route of the candidate's driving school on the interactive map. The system allows you to display the initial and final driving points, chart the movement route, mark larger and minor errors, and display the direction of vehicle movement. It was developed using the Angular for the frontend, Firebase for the database and server function, and the Google Maps API to display maps. The aim of the project is to facilitate driving analysis instructors and provide candidates with better insight into their own progress.
